

## Poinsettia Star

1. Cut out page. Cut off margins if you don't want any blank spaces on your decoration.
2. Do a fan fold going across the paper lengthwise. Tie it off in the middle with string, or use a stapler to secure the middle. The staple should be perpendicular to the text and as centered as possible (see placement of string in step 3).

3. If you want your poinsettia to have pointed edges, then cut the folded tips to look like the edge of a fence post.

4. Spread out the fan and use your glue gun to attach the sides to each other.

5. Hand cut a circle and glue it over the center to cover the yarn or staple.

6. Tie a knot in a piece of yarn to make a loop that is a few inches long. Glue the ends to the back of the ornament.
